

On the Origin of Species By Means of Natural Selection by Charles Darwin

[QR code](#)

"On the Origin of Species By Means of Natural Selection" by Charles Darwin is a work of scientific literature published in 1859. It introduced the theory that populations evolve through natural selection, with life's diversity arising from common descent through a branching pattern of evolution.

Darwin presented evidence from his Beagle expedition and years of research to challenge the belief that species were unchanging. The book sparked intense scientific, philosophical, and religious ... [Read more](#)
